AFFORDABLE ESSENTIALS IN A CONVENIENTLY SIZED PACKAGE

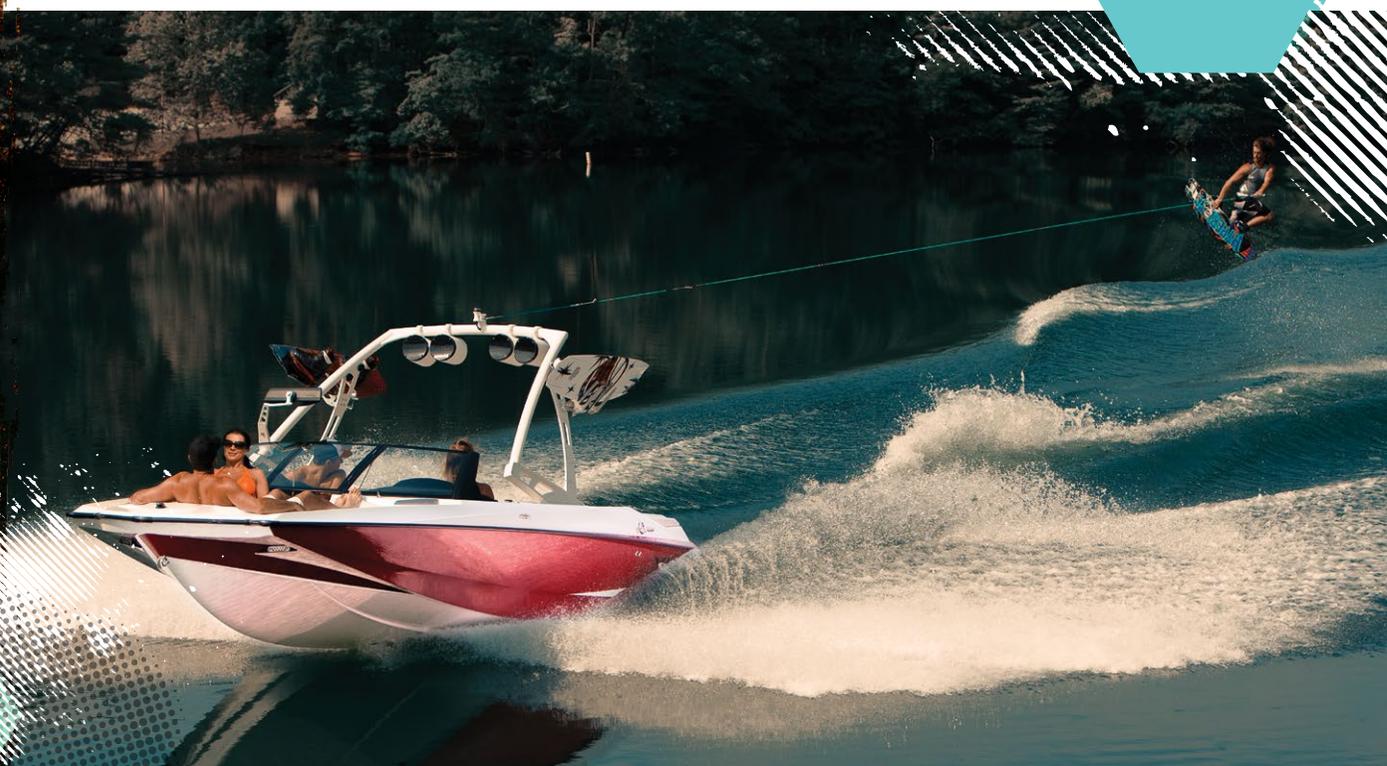

If you're looking for a modern, responsive and versatile boat that includes everything you need and nothing more, the A20 is right up your alley. You'll be hard-pressed to find another boat in this class with equal performance. With perfectly shaped wakes for riders of all levels and the ability to please skiers, this boat also is a dream to trailer and store. Simplistic controls and trustworthy functionality has many people sold on this boat that will always turn heads on the water.

KEEP IT
SIMPLE

ALL DAY
EVERY DAY

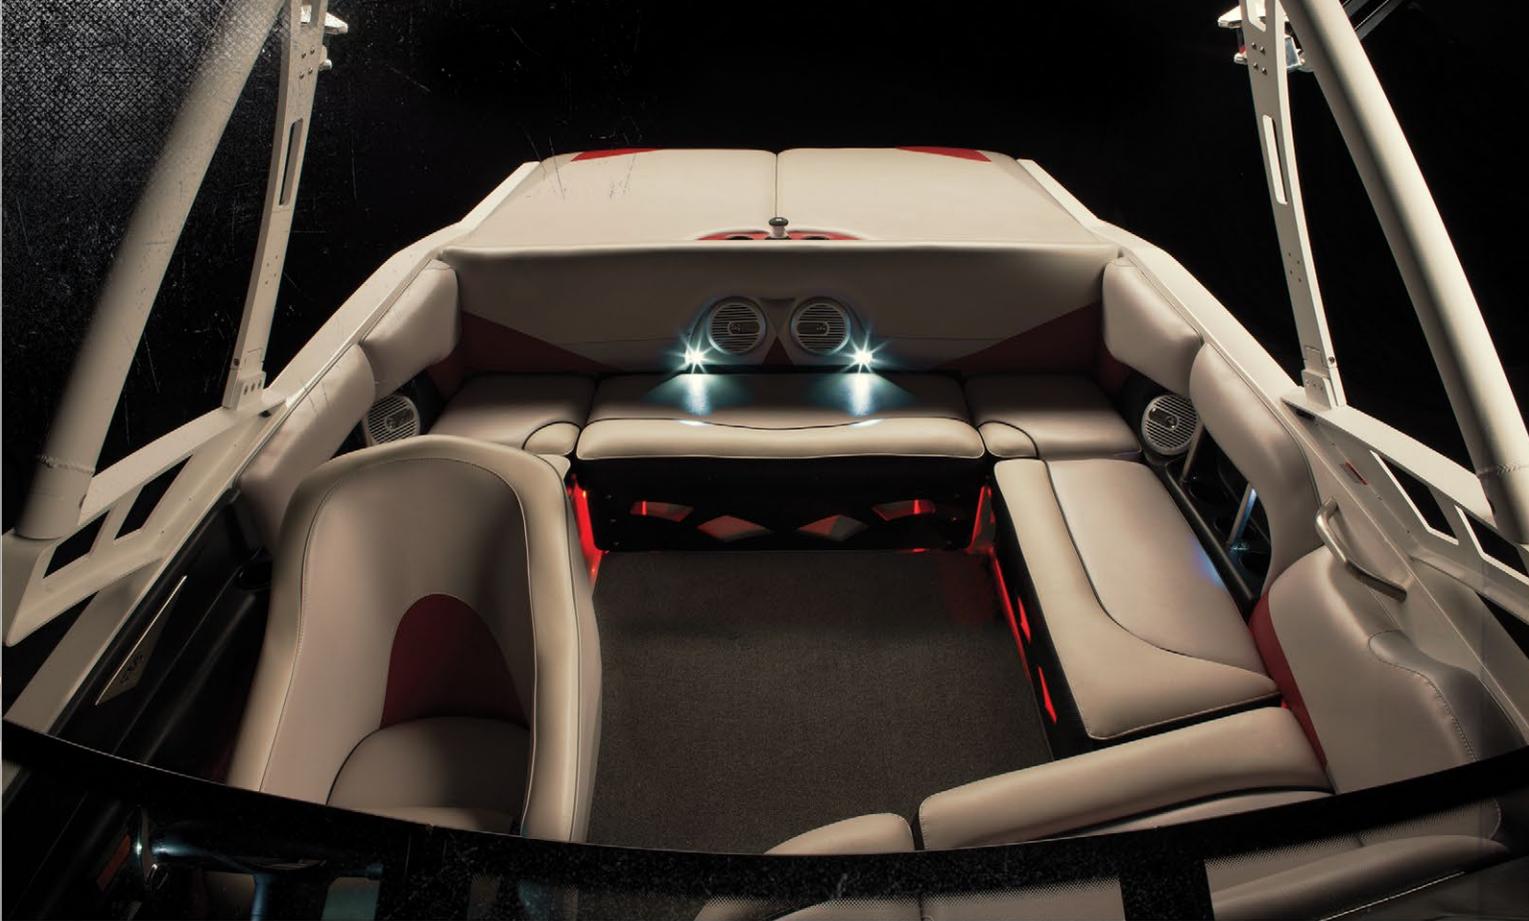

— AXIS —
A20

A new driver-side dash system highlights the updates for 2013 featuring a Wedge position indicator and auto volume control. Opt for GPS speed control and get the perfect pull every time. Everyone will be psyched on the speed of our new HI FLO pumps/hoses and advanced riders will go for the additional, Plug N Play ballast. With the Wedge down and ballast full, the wake will jack up to pro levels, helping you with more air time to land those elusive new moves. Toggle switches are updated as well as the heater system for those chilly nights on the way back to the dock.

A new, vinyl grain upholstery will be a comfort to all and resists wear and tear. Clever engineering provides more maneuverability of the cockpit cushions, improving storage access, while new grab handles and LED lighting accents the interior.

ALL SYSTEMS GO

When it's time to look and feel good on the water, the A22 is your wingman. Our pro riders choose this boat because it kicks a perfect wake with a solid shape, pleasing hard-chargers like Dean Smith and Randall Harris. While the price tag is easy on your wallet, the A22's aggressive styling and clean lines make you look like a baller.

WINNING

— AXIS — A22

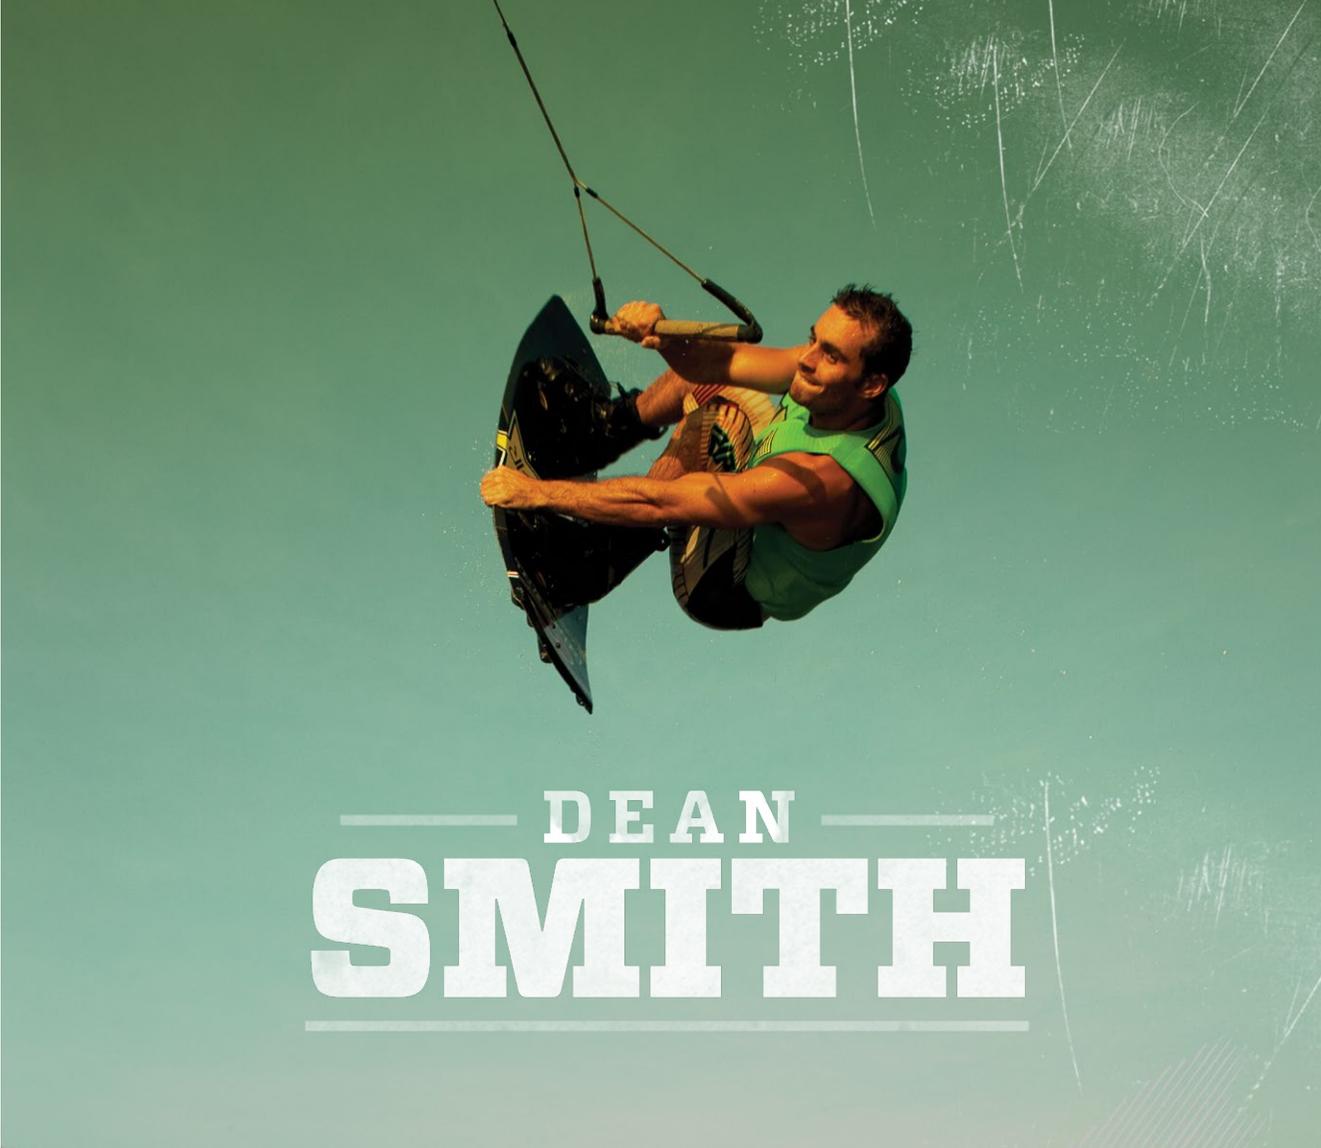

Now in its fifth model year, this time-tested legend has aged like a fine wine, with improvements and enhancements galore. Girls like it, guys dig it and families share their best moments with it. If your focus is clear and you're ready to shred, the A22 is your whip.

Loads of improvements have been made for 2013, including HI FLO ballast pumps and hoses, which decrease your fill and drain time dramatically. This also helps for quick weight adjustments on the fly. Add the Plug N Play ballast option for an additional 800 pounds in the rear and 950 pounds up front. Our new, panoramic mirror gives the driver a 140-degree view, so the rider always is in frame. Optional GPS speed control delivers a smooth pull, so riders can focus on landing new tricks with no worries.

The 2013 A22 is flaunting updates like the A20, including an improved driver-side dash system, with Wedge position indicator and auto volume control. Also designed new for 2013 is the automotive style, three-vent heater system in the dash and footwell. People are digging our new vinyl, which is grained for comfort and durability, and creates a plush look and feel.

RECON

AXIS RECON

As our country's protectors come home, they dream about their next session on the lake. Since our activities stand as amazing examples of freedom, the RECON edition took shape to recognize the men and women who risk their lives to help us preserve what we love to do. Axis Wake Research has supported their efforts since day one, and they have supported Axis by being a soldier's favorite for our styling, simplicity and reasonable price. A portion of the proceeds from every RECON sold will go to the Homes 4 Wounded Warriors (homesforwoundedwarriors.com). This limited-edition package is available on the A20 and A22.

- AutoSet Wedge
- Depth Finder
- TrickedOut Trailer Package With Rockstar Wheels

VANDALL EDITION

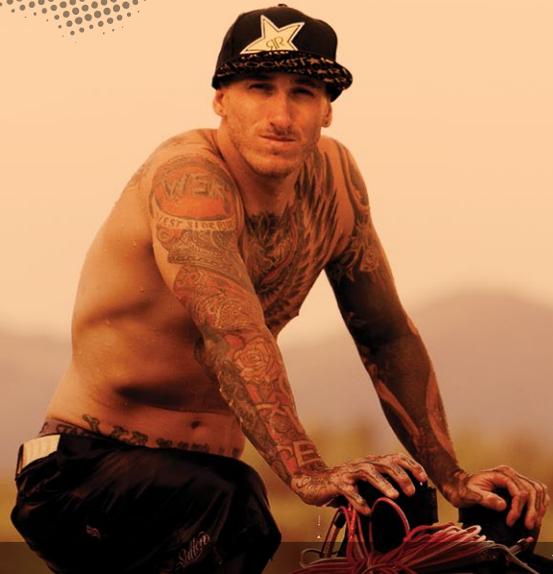

TEAM

DEAN SMITH This 2010 World Champion is still at the top of his game and is at the forefront of today's progressive wake riding. He also goes insanely huge off kickers and is also really fun to watch at any cable park across the globe. Being from Australia, Dean spends half the year in Oz and half in wakeboarding's epicenter, Orlando, Fla. Dean's A22 is known around town for having a huge, meaty wake and you can watch any of Dean's videos online to see how big and stylish he really goes. Anytime you get the chance to hang out with Dean it's guaranteed to be a good time and he has been a great addition to the Axis pro team.

KEITH LYMAN exploded onto the scene in 2001 with tons of energy and a ballistic style. Early on, Keith noticed his freeriding ways were hard to contain in a contest environment. However, Keith's way of riding has garnered the ultimate respect from most every top pro. In 2012, Keith stepped away from the sport he loves to pursue a dream with the U.S. Army, now training at a U.S. military base. He also played a major role in the inspiration and execution of the RECON Edition, now available with a 2013 A20 or A22.

RANDALL "VANDALL" HARRIS has been setting the bar for huge air and legit style since he was 13, when a lot of riders were still "skiboarding." Hailing from Huntington Beach, Calif., he founded West Side Riders (WSR) giving the core group of Cali riders some leadership and a vision. Randall's riding is on another scale. He rides 10 feet longer than most pros and about 5 m.p.h. faster, giving him more time in the air while covering huge distances with his one-of-a-kind style — the kind you can spot from across the lake. Randall has earned global accolades throughout the years, including Alliance Wakeboard Magazine's "Rider Of The Year" in both 2002 and '07. No other rider has won that coveted award twice. Randall is still ripping at full capacity, so stay on the lookout for videos and photos throughout the year and be sure to scope out the hugely popular Vandall Edition A20 and A22.

TREVER MAUR Some guys just get it — and seem to be having more fun than everybody else. Twenty-two-year-old Trevor Maur is a ripper from the California Delta who brings mad style and a killer attitude to the Axis family. With his wrapped tuck-knee spins and legit, between-the-boots grabs, Trevor is one of the most enjoyable riders to photograph and shoot on video. Trevor doubles as a professional filmer/editor in addition to his role as a pro rider. He also runs social media for Axis, so be sure to send him your own cool photos and follow us at [facebook.com/AxisWakeFan](https://www.facebook.com/AxisWakeFan) and [@AxisWake](https://www.instagram.com/AxisWake) (Twitter and Instagram).

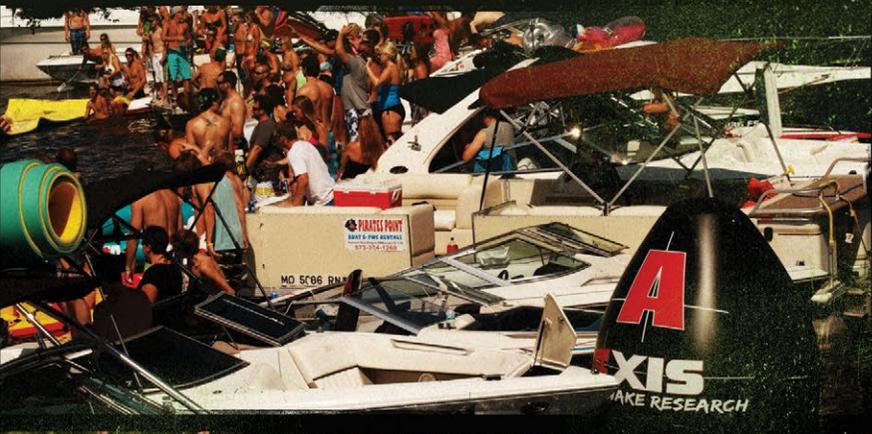

In 2012, Liquid Force and Axis Wake Research joined forces to collaborate on several key grassroots events and one major blowout festival called BROstock. Known as the best party of the year, with a huge prize purse, the A22 delivered clean double-ups for two days, and we already are looking forward to next year's BROstock! Liquid Force founders Tony Finn and Jimmy Redmond shred regularly behind their Liquid Force branded A22 in Southern California, the birthplace of wakeboarding.

STOCK

Standard sub-floor hard tanks create the most reliable and convenient method for serving up the perfect wake. Drop the Wedge and watch the wake peak up even more.

4 20 22

Choose to include the optional Plug N Play ballast, which adds up to 800 additional pounds to the rear and 950 pounds up front. Add weight quickly and conveniently through our new, HI FLO pumps — never dealing with the hassle of manual pumps and sacks in your way again. It's perfect for shaping the ultimate wakesurfing wave or for juicing up the wake to learn new tricks.

SOUND

— PACKAGES —

SOUND PACKAGES

Whether you order our Alpine or WetSounds systems, everyone else is going to want to turn their stereo off when you come by.

TOWERS

We design and manufacture all of our towers in-house. That is one of the ways we save on costs to bring you a better value. This also allows us better quality control. Stylish and functional, the Axis Wake Research V2 tower has a hinged base and folds down easily for storage. Deck it out with speakers, a bimini of your choice, new panoramic mirror and spinning board racks to utilize the tower to its full potential. Available in black, white, and new for 2013, charcoal.

TOWER OPTIONS INCLUDE:

- Quick-release knobs
- Swivel board racks
- Mirror bracket w/integrated bottle opener
- V2 tower
- Fixed combo racks
- PTM mirror
- Bimini top
- Z5 cargo rack

POWER

When it comes to the powertrain, low-end torque, time-to-plane and reliable speed control are just a few areas of prime focus at Axis Wake Research. Choose from the following Monsoon engines and be sure to talk with your dealer about which precision-machined propeller is best for your performance needs. Our standard 5.7L delivers plenty of juice to get you out of the water on anything — boards, skis and tubes. If you need the ultimate in power (and wake size), then you will choose the Corvette LS8 engine. This bad boy delivers 450 HP and will turn your boat into the ultimate ride with perfect, meaty wakes.
